

## My business fits Scheduled Membership and has a turnover greater than €1 million; how do I know we are over the 10 tonne threshold?

### Hotels, Licensed Premises, Restaurants

You can contact your recovery operator and ask for the total weight in materials collection from the business over a 12 month period. Glass will often be the biggest component driving your business over 10 tonnes.

### Independent Retailers, Pharmacies and Hardware Stores

Repak have packaging calculators for these sectors. Quantities of specific ranges of goods sold by your business can be entered into these calculators which will provide a realistic figure of your packaging placed on the Irish market per year.
