

Repak Quality Policy

Quality policy statement

Repak is an industry funded packaging compliance scheme. Based on the principle of producer responsibility, Repak was established for businesses to meet their legal obligations to fund the recovery and recycling of packaging produced or supplied onto the Irish market, as set out in the European Union (Packaging) Regulations and other applicable requirements.

In meeting the above, Repak aims to achieve high levels of Membership satisfaction by delivering on the terms of the Approval of the compliance scheme from the DECC in a cost effective and professional service provision. The quality objectives are aligned to the timeframes of the Approval.

Compliance is monitored by process measures and internal audits. Compliance is maintained by the timely implementation of corrective actions and the assessment and management of risk.

Repak is committed to the continual improvement of its performance through involvement with staff, members, recovery operators, regulatory authorities and the community. This continual improvement will be achieved through the setting, monitoring and review of quality objectives and targets.

To assist with the above, Repak has implemented a Management System that meets the requirements of ISO 9001:2015.

Meeting these standards is the responsibility of the entire team. Repak is therefore committed to working with all stakeholders to support effective operation of the company's Quality Management System and the achievement of goals and specific Quality Objectives.
